### EMC TEST REPORT For

### Shenzhen Jie Zhong Lian Technology Co., Ltd.

#### Leg massager

Model No.: MZ-T01

Additional Model No.: N/A

Prepared for : Shenzhen Jie Zhong Lian Technology Co., Ltd. Address : 5th Floor, Building 3, Xunyuan Zhichuanggu,

Fengtang Avenue, Fuhai Street, Bao'an District,

Shenzhen

Prepared by : Shenzhen AOCE Electronic Technology Service Co.,

Ltd.

Address : Room 202, 2nd Floor, No.12th Building of Xinhe

Tongfuyu Industrial Park, Fuhai Street, Baoan District,

Shenzhen, Guangdong, China

Tel : (+86)755-85277785 Fax : (+86)755-23705230 Web : www.aoc-cert.com

Mail : postmaster@aoc-cert.com

Date of receipt of test sample : November 7, 2025

Number of tested samples : 1

Serial number : Prototype

Date of Test : November 7, 2025 ~ November 17, 2025

Date of Report : November 17, 2025

#### EMC TEST REPORT EN IEC 55014-1:2021

Requirements for household appliances, electric tools and similar apparatus -- Part 1: Emission

EN IEC 55014-2:2021

Requirements for household appliances, electric tools and similar apparatus -- Part 2: Immunity -

Product family standard

Report Reference No. ...... AOC251117102E

Date Of Issue.....: November 17, 2025

Testing Laboratory Name.....: Shenzhen AOCE Electronic Technology Service Co., Ltd.

Industrial Park, Fuhai Street, Baoan District, Shenzhen,

Guangdong, China

Testing Location/ Procedure .....: Full application of Harmonised standards

Partial application of Harmonised standards  $\Box$ 

Other standard testing method  $\square$ 

Applicant's Name ...... Shenzhen Jie Zhong Lian Technology Co., Ltd.

Address .....: 5th Floor, Building 3, Xunyuan Zhichuanggu, Fengtang Avenue,

Fuhai Street, Bao'an District, Shenzhen

**Test Specification:** 

Standard .....: EN IEC 55014-1:2021

EN IEC 55014-2:2021

Test Report Form No.....: AOCEMC-1.0

TRF Originator.....: Shenzhen AOCE Electronic Technology Service Co., Ltd.

Master TRF ...... Dated 2011-03

### 1.2.Description of Performance Criteria

#### **General Performance Criteria**

Examples of functions defined by the manufacturer to be evaluated during testing include, but are not limited to, the following:

- essential operational modes and states;
- tests of all peripheral access (hard disks, floppy disks, printers, keyboard, mouse, etc.);
- quality of software execution;
- quality of data display and transmission;
- quality of speech transmission.

#### 1.2.1.Performance criterion A

The equipment shall continue to operate as intended without operator intervention. No degradation of performance or loss of function is allowed below a performance level specified by the manufacture when the equipment is used as intended. The performance level may be replaced by a permissible loss of performance. If the minimum performance level or the permissible performance loss is not specified by the manufacturer, then either of these may be deriver from the product description and documentation, and by what the user may reasonably expect from the equipment if used as intended.

#### 1.2.2.Performance criterion B

After the test, the equipment shall continue to operate as intended without operator intervention. No degradation of performance or loss of function is allowed, after the application of the phenomena below a performance level specified by the manufacture, when the equipment is used as intended. The performance level may be replaced by a permissible loss of performance.

During the test, degradation of performance is allowed. However, no change of operation state or stored data is allowed to persist after the test.

If the minimum performance level (or the permissible performance loss) is not specified by the manufacturer, then either of these may be deriver from the product description and documentation, and by what the user may reasonably expect from the equipment if used as intended.

#### 1.2.3.Performance criterion C

Loss of function is allowed, provided the function is self-recoverable, or can be restored by the operation of the controls by the user in accordance with the manufacture's instructions.

Functions, and/or information stored in non-volatile memory, or protected by a battery backup, shall not be loss.

### 2. GENERAL INFORMATION

### 2.1.Description of Device (EUT)

EUT : Leg massager

Model Number : MZ-T01

Power Supply : DC 5V, 12W, 3000mAh

EUT Clock Frequency :  $\leq 108 MHz$ 

### 2.2.Description of Test Facility

Site Description EMC Lab.

### 2.3. Statement of the measurement uncertainty

The data and results referenced in this document are true and accurate. The reader is cautioned that there may be errors within the calibration limits of the equipment and facilities. The measurement uncertainty was calculated for all measurements listed in this test report acc. To CISPR 16 – 4 "Specification for radio disturbance and immunity measuring apparatus and methods – Part 4: Uncertainty in EMC Measurements" and is documented in the AOC quality system acc. To DIN EN ISO/IEC 17025. Furthermore, component and process variability of devices similar to that tested may result in additional deviation. The manufacturer has the sole responsibility of continued compliance of the device.

Report No.: AOC251117102E

### 2.4. Measurement Uncertainty

Test Item		Frequency Range	Uncertainty	Note
Radiation Uncertainty		30MHz~200MHz	±2.96dB	(1)
	•	200MHz~1000MHz	±3.10dB	(1)
Conduction Uncertainty	:	150kHz~30MHz	±1.63dB	(1)
Power disturbance	:	30MHz~300MHz	±1.60dB	(1)

<sup>(1).</sup> This uncertainty represents an expanded uncertainty expressed at approximately the 95% confidence level using a coverage factor of k=2.

# 3. MEASURING DEVICES AND TEST EQUIPMENT

# 3.1.Radiated Disturbance (Electric Field)

Item	Test Equipment	Manufacturer	Model No.	Serial No.	Last Cal.
1	EMI Test Receiver	ROHDE & SCHWARZ	ESCI	101142	2025/04/13
2	EMI Test Receiver	ROHDE & SCHWARZ	ESPI	101840	2025/04/13
3	Log per Antenna	SCHWARZBECK	VULB9163	9163-470	2025/04/13
4	Amplifier	Compliance Direction	PAP-0102	21001	2025/04/13
5	<b>EMI Test Software</b>	AUDIX	E3	N/A	2025/04/13

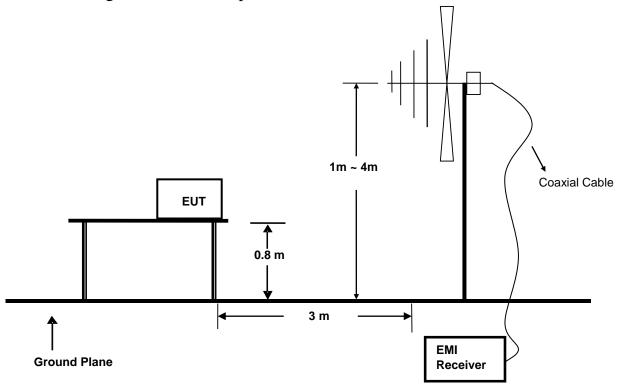

Report No.: AOC251117102E

### 3.2. Electrostatic Discharge

Item	Test Equipment	Manufacturer	Model No.	Serial No.	Last Cal.
1	ESD Simulator	KIKUSUI	KC001311	KES4021	2025/04/13

### 4. RADIATED EMISSION MEASUREMENT

### 4.1.Block Diagram of Test Setup

## 4.2.Measuring Standard

EN IEC 55014-1:2021

#### 4.3. Radiated Emission Limits

EN 55032: 2015 Limits:

All emanations from a class B device or system, including any network of conductors and apparatus connected thereto, shall not exceed the level of field strengths specified below:

FREQUENCY	DISTANCE	FIELD STRENGTHS LIMIT
(MHz)	(Meters)	(dBµV/m)
30 ~ 230	3	40
230 ~ 1000	3	47

Note: (1) The smaller limit shall apply at the combination point between two frequency bands.

(2) Distance refers to the distance in meters between the measuring instrument antenna and the closed point of any part of the EUT.

### 4.4.EUT Configuration on Test

The EN 55032 regulations test method must be used to find the maximum emission during radiated emission measurement.

### 4.5. Operating Condition of EUT

- 4.5.1 Turn on the power.
- 4.5.2 After that, let the EUT work in test mode (ON) and measure it.

#### 4.6.Test Procedure

The EUT is placed on a turntable, which is 0.8 meter high above the ground. The turntable can rotate 360 degrees to determine the position of the maximum emission level. The EUT is set 3 meters away from the receiving antenna, which is mounted on a antenna tower. The antenna can be moved up and down from 1 to 4 meters to find out the maximum emission level. By-log antenna is used as a receiving antenna. Both horizontal and vertical polarization of the antenna is set on test.

The bandwidth of the Receiver is set at 120kHz.

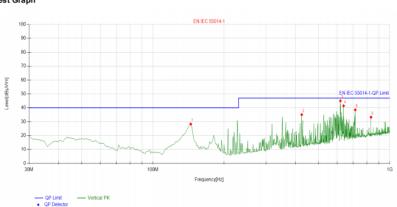

The frequency range from 30MHz to 1000MHz is investigated.

#### 4.7.Test Results

#### PASS.

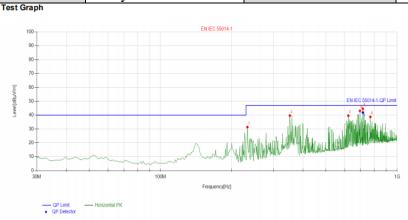

The test result please refer to the next page.

### 5. ELECTROSTATIC DISCHARGE IMMUNITY TEST

### 5.1.Block Diagram of Test Setup

#### Ground

### 5.2.Test Standard

EN IEC 55014-2:2021,

Severity Level: 3 / Air Discharge:  $\pm 8$ KV, Level: 2 / Contact Discharge:  $\pm 4$ KV)

### 5.3. Severity Levels and Performance Criterion

#### 5.3.1. Severity level

Level	Test Voltage Contact Discharge (KV)	Test Voltage Air Discharge (KV)
1.	±2	±2
2.	±4	<u>±</u> 4
3.	±6	±8
4.	±8	±15
X	Special	Special

#### 5.3.2.Performance Criterion: **B**

### 5.4.EUT Configuration on Test

The configuration of EUT is listed in Section 3.2.

### 5.5. Operating Condition of EUT

- 5.4.1. Setup the EUT as shown on Section 5.1.
- 5.4.2. Turn on the power of all equipments.
- 5.4.3.Let the EUT work in measuring mode (ON) and measure it.

#### 5.6.Test Procedure

#### 5.6.1. Air Discharge

This test is done on a non-conductive surface. The round discharge tip of the discharge electrode shall be approached as fast as possible to touch the EUT.

After each discharge, the discharge electrode shall be removed from the EUT. The generator is then re-triggered for a new single discharge and repeated 10 times for each pre-selected test point. This procedure shall be repeated until all the air discharge completed

#### 5.6.2.Contact Discharge

All the procedure shall be same as Section 5.6.1. Except that the tip of the discharge electrode shall touch the EUT before the discharge switch is operated.

#### 5.6.3.Indirect Discharge For Horizontal Coupling Plane

At least 10 single discharges (in the most sensitive polarity) shall be applied at the front edge of each HCP opposite the center point of each unit (if applicable) of the EUT and 0.1m from the front of the EUT. The long axis of the discharge electrode shall be in the plane of the HCP and perpendicular to its front edge during the discharge.

#### 5.6.4.Indirect Discharge For Vertical Coupling Plane

At least 10 single discharge (in the most sensitive polarity) shall be applied to the center of one vertical edge of the coupling plane. The coupling plane, of dimensions 0.5m X 0.5m, is placed parallel to, and positioned at a distance of 0.1m from the EUT. Discharges shall be applied to the coupling plane, with this plane in sufficient different positions that the four faces of the EUT are completely illuminated.

#### 5.7.Test Results

#### PASS.
